

Work smarter with the **FlowJet™** from SpeedClean®

High flow, continuous cleaning.
The FlowJet from SpeedClean with chemical injection, makes quick work of cleaning debris and grime from microchannel and thick condenser or evaporator coils. Now **deliver professional results** in a compact, portable solution.

The FlowJet connects to a water source to deliver a continuous spray of water and cleaning chemical to **wash even the dirtiest coils, without damaging sensitive fins.** And the optional Wonder Wand lets you clean coils from the inside out – a proven method for increasing coil cleaning and system efficiency. **Now that's smart.**

Fine or wide spray

**Easy cleaning
in any situation**

*Shown with optional spray wand.

- Connects to water source for continuous cleaning.
- Powerful 400 PSI spray at 2.2 GPM cleans debris and grime without damaging fins.
- Optional spray wand with 90° nozzle lets you clean from the inside out. Forces dirt and debris back in the direction it entered.
- Chemical injection on downstream side of pump.
- Includes: FlowJet Unit, 2 standard spray nozzles, 12' hose, 25' power cord with GFCI protection, spray gun and 18" lance assembly.

SPEEDCLEAN®
