

# Bucket Descaler Chemical Compatibility

These lists are not all-inclusive or exclusive.

## Materials in fluid contact

### **Pump head**

- Polypropylene
- EPDM
- Santoprene

### **Valves**

- Brass
- Polypropylene

### **Hoses**

- Polyethylene
- PVC
- Polypropylene

## Non-wetted parts

### **Metals**

- Carbon Steel
- Brass
- Stainless Steel
- Teflon tape

### **Plastics**

- ABS
- PVC
- Rubber

### **Protective coatings**

- Zinc plating and galvanizing

### **Other**

- Loctite thread sealant
- Teflon tape

## List of compatible chemicals

- Phosphoric acid (up to 15%)
- Hydrochloric Acid (up to 37%)
- Muriatic Acid (HCL 37%)
- Nitric Acid (up to 25%)
- Sodium Hydroxide (up to 15%)
- Sulfuric Acid (up to 10%)

## Notes

User must be very careful not to splash outside of unit with any chemical.

Unit should be flushed with water after every use, regardless of chemical used.
